

one answer to all your transcription questions!

An outsourcing partner you can trust.

Outsource to Global Transcripts and save!

At Global Transcripts, we aim to partner with hospitals, clinics and private practices of all sizes and plan cost saving measures. We've helped facilities save thousands of dollars annually by simply moving from an in-house to outsourced transcription model.

No Fixed Costs: Global Transcripts makes transcription costs truly variable. With us, there is no transcription cost if there are no dictations from you. Savings are immediately realized from our per line fees, which are the lowest in the industry - ranging from 8-12 cents per line.

Increased Focus: A transcription department within a healthcare facility often keeps administrators and doctors occupied with mundane issues. It takes away time and resources that could be better spent on patient-care. In addition, the valuable office space.

Shrinking Labor Force: Independent studies indicate that the number of qualified transcription professionals in the U.S. is reducing steadily. According to the Medical Transcription Industry Alliance (MTIA), the decrease is about 10% every year. The answer is to be prepared. Today, outsourcing assures better quality, accuracy, turn-around-time and customer service.
